# Adobe Connect – Audio Settings

Before a Meeting

To test and configure your audio settings for use in Adobe Connect before a meeting, run the system check from the following link:
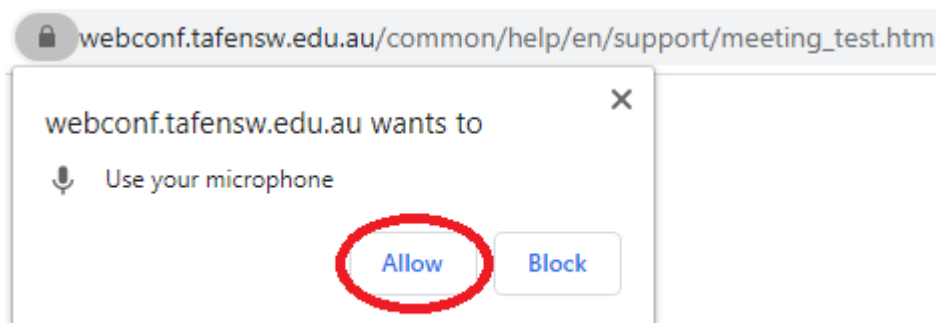

System Check

Click the highlighted **Configure Audio** button to launch the audio setup wizard.

Complete the audio wizard checks to ensure your speakers and microphone are working correctly.

If prompted, allow the use of your microphone:

During a Meeting in the Web Browser

To check your audio settings during a meeting, click the three dots at the top right of the Adobe Connect screen and select **Speaker/ Microphone Setup**

Here you can test and choose which speakers/microphone to use within Adobe Connect. If prompted, allow the use of your microphone as shown below.

During a Meeting in the Stand Alone Application

Open the Meeting menu in the top left of the application and select **Audio Setup Wizard…**

Follow the audio wizard checks to ensure your speaker and microphone are working correctly using the drop down menus to choose the correct speakers/microphone devices.

Allow Adobe Flash Player settings if prompted.
